

Combined UNWIN systems for chair and passenger restraint

Combined for chair and passenger restraint (Reference 9520)

This 4-point restraint system for rails combines the strap fastening to secure the wheelchair with the reel belt kit and the stalk.

- The two rear tape are fully adjustable thanks to a simple mechanism that allows tensioning the tape for greater safety.
- The front restraints are equipped with a buckle closure for easy use.
- The rear restraints are equipped with a carabiner closure.
- They are tested to withstand forces of 120 kg each of the elements.
- Can be installed in both M1 and M2 and M3.
- The casing consists of two reels, the black one is for the ventral support (around the belly) and the red reel is for the option of securing the third point on the shoulder.
- The reels have a safety brake system.

Possibility of acquiring only the rear support (9520/1)

REAR RESTRAINT

FORWARD RESTRAINT
