

## UNWIN Systems for seat fixing

### Removable seat fixings

These seat installations allow any seat to be easily installed or uninstalled from the vehicle provided with guides, both surface and low profile rail. These fixings for removable seat exist of three different types:

#### 1- Standard seat fixture SL (Reference 9511)

- The plunger mechanism allows the seat to be quickly locked in place.
- The removable seat fixing is equipped with 3 screws for a more secure fixing.

#### 2- HAL fixing seat (Reference 9524/1)

- Easy to use with just one hand, it has a clamping system that activates joystick type.
- The HAL seat fixing is equipped with a screw that runs to secure the legs of the seat.

#### 3- Fixing ULS seat (Reference 9555)

- The Unwin Locker comes with an integrated wheel to allow for easy location in the rail and can be locked into place with one single foot operation, per fixture.
- ULS seat fixation is equipped with a screw that runs to secure the legs of the seat.
